

CONCEPT NOTE

MARKET FOR AGRICULTURAL INNOVATIONS AND TECHNOLOGIES (MITA) ABDOULAYE TOURE AGRICULTURAL INNOVATION AWARD FORUM & EXHIBITION

THEME: FACILITATING ACCESS TO AGRICULTURAL TECHNOLOGIES
AND INNOVATIONS FOR ANIMAL PRODUCTION AND THE
INTEGRATED AGRICULTURE-LIVESTOCK-AQUACULTURE SYSTEM

Under the High Patronage of His Excellency **Dr. Julius MAADA BIO**,
President of the Republic of Sierra Leone, and chaired by **Dr. Henry Musa
KPAKA**, Minister of Agriculture and Food Security of Sierra Leone

DATE & VENUE | **19^{TO} 23 OCT. 20²⁰**
FREETOWN, SIERRA LEONE

6th edition of the MARKET FOR AGRICULTURAL INNOVATION AND TECHNOLOGY (MITA)

**3rd Edition of the Abdoulaye Toure
Agricultural Innovation Award**

I- BACKGROUND

CORAF was created in 1987 to “*improve livelihoods in West and Central Africa through sustainable increases in agricultural production and productivity, and to promote competitiveness and market access*”. CORAF’s main objective is to work towards addressing the critical problems of food and nutritional insecurity, chronic poverty and youth unemployment.

Against a backdrop characterised by the effects of climate change, population growth, changing markets and growing food security needs, countries in the region must accelerate the adoption of high-performing, resilient agricultural technologies and innovations that are tailored to the needs of producers, agribusinesses and consumers. However, many research-validated technologies remain under-utilised or struggle to be scaled up due to constraints relating to access to information, funding, partnerships and technology transfer mechanisms.

CORAF is currently implementing several initiatives, including the FSRP program (Food System Resilience Program), as well as the TARSP II programme (Agricultural Technologies and Innovations to Enhance the Resilience of Production Systems and Family Farms in West and Central Africa) and the RADiUS programme (Agroecology Network to Promote the Sustainability of Food Systems in West and Central Africa).

What these CORAF initiatives have in common is that they aim to further promote access to, and the scaling-up of, agricultural technologies and innovations. This is the backdrop to the current Market for Agricultural Innovations and Technologies (MITA), which is initiated by CORAF.

The concept of the Market for Agricultural Innovations and Technologies (MITA) implemented by CORAF as part of the West African Agricultural Productivity Program (WAAPP) over the 2007-2019 period has proved its worth as it has enabled over a hundred technologies to travel across the borders of West and Central African countries. The concept has undergone several evolutions, and now has a virtual mobile web application platform on the CORAF website (<http://mita.coraf.org/>). The event, which was initially organized in-person with the participation of delegations from the 13 WAAPP implementing countries, has since been continued in 2021, 2022 and 2023, in the form of fora and technology fairs, with over a hundred participants from the various agricultural research sectors, as well as agricultural and agro-industrial professionals from all over Africa and beyond.

Today, in-person MITA is a major interface between agricultural research, providers of agricultural technologies and innovations, players in agricultural value chains and consumers in West and Central Africa.

MITA provides an opportunity for research organizations, the private and public sectors, and potential users of technologies and innovations to come together. It facilitates connections between holders of proven technologies and potential investors, developers or buyers, through dedicated B2B networking spaces where discussions and reflections on key themes are organized in the form of forums and parallel sessions. It also provides an opportunity to mobilize young people in favor of agricultural R&D and agribusiness.

While the 2025 edition themed around “**agricultural technologies and innovations for Integrated soil management**”, the 2026 edition will place particular emphasis on “**agricultural technologies and innovations for animal production and the integrated agriculture-livestock-aquaculture system**”.

The organization of MITA 2026 is receiving financial support from two initiatives backed by the World Bank and the European Union. The main funding comes from the Food Systems Resilience Programme (FSRP), notably through its sub-component 2.1, which aims to strengthen the regional agricultural innovation system by promoting access to, dissemination

of and exchange of technologies and innovations within the region. In addition, there is financial support from the TARSPo II project (Agricultural Technologies and Innovations to Enhance the Resilience of Production Systems and Family Farms in West and Central Africa), which aims to accelerate the adoption of agricultural technologies to strengthen the resilience and productivity of farms.

Furthermore, in order to generate interest in the creation of cutting-edge agricultural innovations that will transform the agricultural and food systems of West and Central Africa, CORAF, in collaboration with partners, is jointly organizing with MITA, the third edition of the Abdoulaye TOURE Agricultural Innovation Award (PIA-Abdoulaye TOURE) which aims to sensitize, incentivize, and motivate as well as encourage interest in creating cutting edge agriculture innovations that can leave measurable impacts in the agriculture and food systems of West and Central Africa. The prize will be awarded to researchers/inventors or organizations working in the private sector or in National Agricultural Research Systems (NARS) who are helping to build a better future through cutting-edge agricultural innovations that have a positive impact on the activities of farmers in West and Central Africa.

THE ABDOULAYE TOURE 2026 AGRICULTURAL INNOVATION PRIZE (3rd EDITION) IS DIVIDED INTO THREE CATEGORIES:

- ▶ **CATEGORY 1** : Agricultural innovations to address low agricultural production and productivity
- ▶ **CATEGORY 2** : Agricultural innovations to mitigate increasing climate risks
- ▶ **CATEGORY 3** : Agricultural innovations for adequate and sustainable agricultural financing and trade

WHO ARE THE POTENTIAL TECHNOLOGY PROVIDERS FOR AGRICULTURAL TECHNOLOGIES AND INNOVATIONS FOR ANIMAL PRODUCTION AND THE INTEGRATED AGRICULTURE-LIVESTOCK-AQUACULTURE SYSTEM?

1

National agricultural research systems (NARSS),

2

CORAF's 11 national & regional centers of specialization/Excellence, which have generated countless technologies over the period 2007 to the present day. ;

3

CGIAR centers and other international research institutions that generate technologies that meet the challenges of West and Central African production systems.

4

Incubators, start-ups and AgTech companies developing innovative, proven and/or certified solutions for agricultural value chains;

5

NGOs and other private-sector players. These private-sector players include companies or individual craftsmen, or those organized in chambers of trade, involved in the development of agricultural value chains. They are also key players in the generation/adaptation and dissemination of agricultural and agro-industrial technologies.

WHO WILL BUY THE TECHNOLOGIES FOR ANIMAL PRODUCTION AND THE INTEGRATED AGRICULTURE-LIVESTOCK-AQUACULTURE SYSTEM?

The buyers are all potential users of agricultural T&I, particularly in the 23 countries of West and Central Africa, which are also waiting for technologies and innovations that meet the

specific needs of men, women and youth for upscaling, in order to meet the food needs of the region's populations and agro-industry.

THE NATURE OF THE TECHNOLOGIES FOR ANIMAL PRODUCTION AND THE INTEGRATED AGRICULTURE-LIVE-STOCK-AQUACULTURE SYSTEM:

The focus of this 2026 edition of MITA is on promoting T&I for animal production and the integrated agriculture-livestock-aquaculture system that responds to the needs of the various links (production, post-harvest, processing, mechanization, etc.) in agricultural value chains and Integrated Landscape Management. In particular, this

includes climate-smart and nutrient-sensitive T&I for integrated soil management. Priority is given to technologies that have completed their generation path, i.e. are proven and ready for adoption by end-users. Best technologies in line with these guidelines will receive special awards.

II- OBJECTIVES OF MITA AND ABDOULAYE TOURE AWARD 2026

- ✓ Promote scientific partnerships and technology exchanges between agricultural research organizations;
- ✓ Organize contacts between providers of agricultural technologies and innovations and potential users;
- ✓ Discuss emerging topics, issues and challenges in acquiring, deploying, connecting and disseminating agricultural technologies and innovations for the benefit of young people and women;
- ✓ Generate a strong political commitment to support agricultural research and the scaling-up of integrated soil management technologies;
- ✓ Encourage young people and the private sector to take up farming as a career
- ✓ Strengthen evidence-based action and impact in thematic priorities in line with country agricultural policies and the 2030 Agenda for Sustainable Development;
- ✓ Announce the winners of the Abdoulaye TOURE agricultural innovation awards.

III- EXPECTED OUTCOMES OF MITA AND ABDOULAYE TOURE AWARD 2026

Expected outcomes from MITA and Abdoulaye Toure Award 2026 are:

- ✓ Scientific partnerships and technology exchanges between research organizations are promoted;
- ✓ Connections between providers of technologies and innovations and potential users are facilitated;
- ✓ The technologies and innovations showcased at the event are used to enhance the digital platform for post-event promotion;
- ✓ Strong political commitment to support agricultural research and the scaling of integrated soil management technologies is supported;
- ✓ Evidence-based Impact in priority thematic areas in line with regional agricultural policy and the 2023 Agenda for Sustainable Development is supported;
- ✓ The promotion of agricultural innovation is further strengthened by the Abdoulaye Toure Award;

IV- CONDUCT OF MITA 2026

The MITA is a platform for dialogue and exchange of agricultural technologies and innovations (T&I) between the organizations and players that provide agricultural technologies and innovations, on the one hand, and the users and suppliers of these technologies and innovations, on the other. The MITA comprises a number of information and technology exchange and networking sessions, as well as exhibition and demonstration spaces for technologies and innovations for the benefit of the public and agricultural professionals:

1. OPENING/KICK-OFF CEREMONY

It is being held under the very high patronage of the His Excellency, President Julius Maada Bio and the co-sponsorship of the Minister of Agriculture and the Minister of Fisheries and Marine Resources of Sierra Leone. The opening ceremony will be chaired by Dr Henry Musa Kpaka, Sierra Leone's Minister for Agriculture and Food Security. He will be joined by the Ministers for Agriculture, Livestock and Fisheries from the FSRP beneficiary countries, Guinea and Liberia.

The Executive Director of CORAF, producers' representatives and development partners (World Bank, European Union, Swiss Cooperation) will also speak.

The opening speech for MITA 2026 will be given by the Minister of Agriculture of Sierra Leone, followed by an official visit to the exhibition stands and a ministerial panel discussion on policies and strategies for scaling up agricultural technologies and innovations.

2. PRESENTATION/INFORMATION SESSION ON AGRICULTURAL T&I AND START-UPS

It will feature a plenary session presenting agricultural T&I. For this edition, the focus is on proven technologies for animal production and the integrated agriculture-livestock-aquaculture system.

The session will last one day. Research organizations (SLARI, CS, CGIAR, etc.) and start-ups. T&I providers will be invited to present their proven T&I in various formats (Powerpoint presentations, posters, videos of up to 10 minutes, leaflets or physical presentations). Presentations should cover the following points: (i) the value proposition of the technology/innovation (what problem does the technology solve?), (ii) technical performance;

(iii) acquisition cost; (iv) profitability; (v) potential environmental impact, (vi) name and contact details of the technology developer and host institution.

The presentations will be followed by a Q&A session for a better understanding and discussion of the proposed T&I.

For optimum management of communication, the provider should send CORAF, 2 weeks before the date of the event, a technical and economic data sheet for each technology or innovation to be posted on the MITA electronic platform and highlighting the key information on the technology.

3. B2B / TRADING ROOMS SESSION

A special business networking and partnership session will be organized. This will be a buying session and/or registration of T&I buying intentions between outfitters and all potential buyers.

In this trading room, technology providers will have a space (Table) where they will receive potential buyers, who will be able to go there

to express a quantitative demand for the technology or innovation, and agree to the provision of the quantities expressed with the provider in a contractual form.

In order to measure impact, CORAF will provide tools for collecting information and monitoring contacts and the implementation of technology and innovation exchanges.

4. TECHNOLOGY AND INNOVATION SHOWROOM

A technology and innovation exhibition space will be arranged and allocated to technology suppliers, private sector players, and partner projects, programs and organizations.

promote technologies/innovations will be able to acquire exhibition stands. For this 2026 edition, priority will be given to technologies for integrated soil management.

Partners and players who are willing to

Potential exhibitors include:

- ▶ National Agricultural Research Systems (NARSs) with National Centers of Specialization and Regional Centers of Excellence,
- ▶ International research centers (CGIAR),
- ▶ National/regional projects and programs for agricultural development and the scaling-up of agricultural and agro-industrial technologies and innovations,
- ▶ NGOs and agricultural artisans/outfitters,
- ▶ Agricultural production companies and agro-industries, especially young people's businesses,
- ▶ Providers of innovative services and solutions to the agricultural sector (agricultural banks and insurance companies, agricultural service platforms, e-extension, e-marketing, etc.),
- ▶ Agricultural training centers and institutes.

5. FEEDBACK FROM COUNTRY DELEGATIONS ON B2B MEETINGS

At the end of the B2B exchanges, each country delegation will make a PowerPoint presentation of the technologies that have

caught their attention for acquisition, as well as the acquisition plans agreed with each technology and innovation supplier.

6. FORUM AND PANEL DISCUSSION

This session aims to create a space for exchange, communication and sharing of experience in the development, upscaling and valorization of agricultural technologies and innovations. The Forum and panel sessions will provide an opportunity to communicate and exchange views on the key priorities for the future dissemination of technologies and innovations originating from research centers, as well as the factors driving the expansion and upscaling of proven agricultural technologies and innovations in West Africa. To this end, the ministers of agriculture of the countries benefiting from the FSRP/PRSA, will be asked to identify the levers that can be used to accelerate the acquisition of the selected T&I by answering the question : *Contribution of research-derived*

technologies to the sustainable improvement of animal production in PRSA/FSRP countries: opportunities, challenges and issues of transfer between research and farmers?

In addition, several projects/programmes ssuch as PRAPS, P2RS, PRADEP are currently operating under the leadership of CILSS, ILRI, WALIC, World Fish, FAO, and ICIPE in the CORAF space. Experts from these initiatives will be invited to share information on the contribution of their initiatives to the deployment of the technologies for animal production and the integrated agriculture-livestock-aquaculture system in the countries covered by the resilience program and elsewhere.

7. SIERRA LEONE DAY

Within the framework of the West African Agricultural Productivity Programme (WAAPP), Sierra Leone has opted to mobilize resources around the Sierra Leone Agricultural Research Institute (SLARI) to set up a National Centre of Specialization (NCoS) on mangrove rice. The low level of technology adoption is one of the limiting factors in the transformation of agriculture in West and Central Africa. This is why CORAF has undertaken to set up agricultural technology parks to bring T&I closer to the end beneficiaries. Technology and innovation parks are spaces where advanced and proven technologies and innovations in the agricultural value chain are exhibited, or demonstrated on a large scale in showcase

form, where stakeholders can learn about them and appropriate them to improve their own production systems. For the 2026 edition of MITA, a day will be dedicated to the SLARI/ NCoS to enable the authorities and participants to discover the potential and achievements of the Centre and its partner organizations. This visit will offer a unique chance to see high-performing technologies in real conditions, to exchange views with researchers and users of the innovations, and to explore the possibilities for replicating and adapting these solutions in other countries in the region. It will also help to strengthen regional collaborations and promote the sharing of experiences in the field of agricultural innovation.

8. MONITORING AND EVALUATION OF IMPACTS

To monitor and evaluate the technical and economic impact of the event, surveys will be conducted. These will focus on the technologies presented, attendees' profiles and purchasing intentions. A group of 10 young agronomists, data collector with tablets will be hired in Sierra Leone and trained for data collection. Kobo Collect and Forms softwares

will be used for data collection. Tracking sheets will be developed and implemented on the tablets. A reporting group composed of researchers from CORAF and SLARI will be set up to produce the final report on the event. All data collected will be published in figures in iCORAF (reporting dashboard).

9. ABDOULAYE TOURE AWARDS CEREMONY

The afternoon of day 5 will be marked by the announcement and presentation of the Abdoulaye TOURE Innovation Awards to the various winners in the 3 categories. The results will be announced by the chairman of the independent international prize

evaluation committee. The prizes will be presented by Sierra Leonean officials and CORAF's technical and financial partners. A special ICIPE prize will be awarded for the best insect-based and nature-positive innovation.

10. CLOSING CEREMONY

The closing ceremony will be marked by various speeches:

- ▶ Speech by the Executive Director of CORAF to present the results of the MITA (final communiqué)
- ▶ Speech by the representative of the Technical and Financial Partners
- ▶ Closing speech by the Minister of Agriculture

Before the closing speech, which will be given by the Minister of Agriculture, distinctions will be awarded to personalities for their commitment and services rendered for agricultural development and the success of MITA 2026. The MITA flag will also be passed from Sierra Leone to the next host country.

V- PARTICIPANT PROFILE

The participants expected at MITA 2026 are mainly:

POLICY MAKERS

- Ministries of agriculture and other relevant ministries;
- Regional organizations (UEMOA, CILSS, CORAF, FARA, ASARECA, AFAAS, etc.);

SUPPLIERS

- Representatives of institutions providing T&I: national agricultural research and technological innovation institutes, centers of specialization/excellence, CGIAR centers, private sector organizations and other international research institutions operating in West and Central Africa (ILRI, ICIPE, IITA, WALIC, etc.);
- Incubators, accelerators and AgTech companies
- National technology supply organizations, including ADPs and NGOs;
- The private sector in the agricultural and processing value chain;

BUYERS

- Country delegations for FSRP/TARSPRO/PRAPS and other programs and projects, made up of stakeholder representatives (producers, processors, traders, artisans/mechanized tool manufacturers, extension agents, etc.), implementing agencies
- NGOs operating in the agricultural sector;
- Professional agricultural organizations;
- Women's and youth agricultural associations;

PARTNERS

- Development partners (AfDB, FAO, BMGF, GIZ, IFAD, EU, World Bank, SDC, ACIAR, AECID, AGRA, ...etc.);
- Agricultural development projects and programmes
- Other organisations supporting agricultural entrepreneurship

CO-INVESTORS

- Public and private service providers (microfinance organisations, banks, guarantee funds, agricultural insurance, etc.) ;
- Potential investors ;
- Other interested stakeholders.

MEDIA

- National, regional and international media;
- Media specializing in agriculture, research, innovation and rural development;

AGENDA

MITA 2026

VI- DRAFT AGENDA

DAY 1: OCTOBER 19, 2026 10:00–5:30 p.m.: Fair/Exhibition area open		
SCHEDULES	ACTIVITIES	SPEAKER
OPENING CEREMONY (Dress code: Classic or traditional attire)		
08:00 - 09:00	Welcome and Registration of Participants	CORAF
09:00 - 09:40	Video projection Welcome words from the by the President/Head of Freetown City Council (FCC) Speech by the Chairman of the Board of Directors of CORAF, ROPPA speech Speech by the representative of the World Bank, leader of the TFPs Opening Speech by the Minister of Agriculture of Sierra Leone	MODERATOR
	GROUP PHOTO	
09:40 - 10:40	OFFICIAL VISIT TO EXHIBITION STANDS	MODERATOR
10:40 - 11:00	COFFEE BREAK	
SESSION 1: MINISTERIAL PANEL ON THE ACQUISITION OF AGRICULTURAL T&I (MINISTERS OF AGRICULTURE)		
11:00 - 13:00	Panel : Contribution of research-derived technologies to the sustainable improvement of animal production in PRSA/FSRP countries: opportunities, challenges and issues of transfer between research and farmers ? Panelists : Ministers of Agriculture (Burkina Faso, Ghana, Mali, Niger, Senegal, Sierra Leone, Chad, Togo, Guinea, and Liberia)	MODERATOR Ministers of Agriculture
01:00-02:30 PM	LUNCH	CORAF

SESSION 2: PRESENTATION OF AGRICULTURAL T&I (NARS)

2:30-2:45 PM	Commissioned project: Pastoral and Forage Seeds: objectives and expected results	Dr Salissou CRS-EL
02:45-03:00 PM	Pastoral and forage seeds T&I promoted	
03:00-03:15 PM	Automatic feed dispensing system for poultry houses (motorised galvanised sheet metal feeders)	Batimsoga Bougra (ITRA)
03:15-03:30 PM	EcoProvende, eco-friendly feed for rabbits	Ogbon Eyitayo Azaratou (IITA Benin)
03:30-03:45 PM	MahuWévi	Hounsou Tadagbé (Ets Gold's Farmers/ TAAT)
03:45-04:15 PM	Q/A (30 MINS)	MODERATOR
4:15 – 4:45 PM	COFFEE BREAK	
04:45-05:00 PM	Distribution of N'dama cattle breeding stock	Aissatou Ndiaye Sarr (ISRA)
05:00-05:15 PM	BetaClic SmartTrace	SYLLA Ismail (BetaClic, SN)
05 :15-05 :35 PM	Q/A (20MINS)	MODERATOR
05:35 PM	END OF DAY 1	

DAY 2: OCTOBER 20, 2026

10:00 a.m. – 5:30 p.m.: Fair/Exhibition Area open

SCHEDULES	ACTIVITIES	SPEAKER
SESSION 3: ANIMAL PRODUCTION AND INTEGRATED SYSTEMS INITIATIVES		
08:30 - 09:00	ILRI	REPRESENTATIVE
09:00-09:30	ICIPE	REPRESENTATIVE
09 :30-10 :00	Panel discussion on Animal production and integrated agric-livestock and aquaculture initiatives in WCA (10 min per Initiative) Panel : ILRI, ICIPE, World Fish	Moderator : Kyky Komla
10:00-10:30	Q/A (30MINS)	MODERATOR
10:30-11:00	COFFEE BREAK	

SESSION 4: PRESENTATION OF AQUACULTURAL T&Is

11:00 - 11:15	Aquapilote	Afandonougbo Komi (Africa Horizon Aquatic, TG)
11:15 - 11:30	System and Method for Computer Vision Assisted Detection and Counting of Fingerlings	Abhulimhen Solomon Okouz (NIFFR)
11:30 - 11:45	Aquafeed-Solver	Boma Soudah (ITRA)
11:45 - 12:00	Improved gas-fired smoker	Igo Wendsida Serge (IRSAT)
12:00 - 12:30	Q/A (30MINS)	MODERATOR
01:00 - 02:30 PM	LUNCH	

SESSION 5 : PRESENTATION OF T&Is FOR INTEGRATED SYTEM

02:30 - 2:45 PM	Climate-Resilient Integrated Agriculture-Livestock-Aquaculture (IALA) System	Alimamy Alie Kamara (SLARI)
02:45 - 3:00 PM	Cattle corralling and micro-dosing of mineral fertilizer	Gounou Sourogou (UP, Benin)
03:00 - 3:15 PM	Azolla-Rice-Aulacode-Fish and Chicken production technology	DJISSOU Sèdjro (Institut Supérieur des Sciences et de Médecine Vétérinaire)
03:15 - 03:35 PM	T&I de ASARECA	Joshua Okonya
03:35 - 04:00 PM	Q/A (25 MINS)	MODERATOR
04:00 - 04:30 PM	COFFEE BREAK	
04:30 - 05:30 PM	Tour of the stands	Moderator & participants
05:30 - 06:00 PM	INFORMATION ON SIERRA LEONE DAY	
06:00 PM	END OF DAY 2	

DAY 3: OCTOBER 21, 2026

9:00 – 17:30:Exhibition space/Exhibition open

SCHEDULES	ACTIVITIES	SPEAKER
SESSION B TO B (TRADING ROOMS)		
08:30 - 09:00	Registration of countries at the technology suppliers' tables	MODERATOR
09:00 - 1:00 PM	Business meeting (B to B) with technology providers	SUPPLIERS / PARTICIPANTS
01:00-02:30 PM	LUNCH	
02:30-4:00 PM	Business meeting (B to B) with technology providers	SUPPLIERS / PARTICIPANTS
04:00-4:30 PM	COFFEE BREAK	
04:30-05:30 PM	Business meeting (B to B) with technology providers	SUPPLIERS / PARTICIPANTS
17:30	END OF DAY 3	

DAY 4: OCTOBER 22, 2026

9:00 a.m. – 5:30 p.m.: Exhibition space / Exhibition open

SCHEDULES	ACTIVITIES	SPEAKER
07:00 – 4:00 PM : SIERRA LEONE DAY		
07:00 – 09:00	FIELD VISIT TO MAGBURAKA (World Food Day) and Technology park and exhibition stands	SLARI-CORAF AND PARTICIPANTS
5:30 PM	END OF DAY 4	

DAY 5: OCTOBER 23, 2026 9:00 a.m. – 3:00 p.m.: Fair/Exhibition area open		
SCHEDULES	ACTIVITIES	SPEAKER
08:30 - 10:30	Presentation of B2B session results	COUNTRY DELEGATIONS
10:30 - 11:00	COFFEE BREAK	
11:00-01:00 PM	Presentation of B2B session results	COUNTRY DELEGATIONS
01:00-02:00 PM	LUNCH	
AI ABDOULAYE TOURE AWARD AND CLOSING CEREMONY		
2:30 – 4:30 PM	AWARD CEREMONY: AIP ABDOULAYE TOURE AND ICIPE SPECIAL AWARD	CORAF AND JURY
04:30-04:40 PM	FINAL PRESS RELEASE	CORAF AND JURY
04:40 PM	SPEECH BY THE CORAF EXECUTIVE DIRECTOR (MITA REPORT) SEECH BY THE REPRESENTATIVE OF THE PTFS CLOSING SPEECH BY MINISTER OF AGRICULTURE AWARDS TO DISTINGUISHED RESOURCE PERSONS PASSING THE TORCH (MITA STANDARD) FROM SIERRA LEONE TO THE NEXT HOST COUNTRY	CORAF AND JURY
04:40 PM	END
